

◆ A. Web Application Types & Business Drivers

1. ✓ What are business to consumer (B2C) and business to business (B2B) Web applications, and what are some examples of each type?
 2. List out some of the business drivers for today's information system.
 3. Show the business factors that are driving system analysis. Based on these factors, what should system analysis address? ★
-

◆ B. System Development Life Cycle (SDLC)

4. Briefly describe the four steps in a system development process. Discuss what happens in each step. ★
 5. What are the four steps in a system development process? Discuss what happens in each step. ★ (Repeated)
 6. Briefly describe the eight major activities in the project management life cycle. ★
 7. Briefly describe about the eight major activities in the project management life cycle. ★ (Repeated)
-

◆ C. Role of Systems Analyst & Common Traps

8. You are a new systems analyst and eager to prove your abilities on your first project... into what common trap are you in danger of falling? What technique could you use to avoid the trap? ★
 9. Why do many new systems analysts fail to effectively analyze problems? What can they do to become more effective? ★
 10. What kind of knowledge and skills should a system analyst possess?
 11. Differentiated between the role of system analysis and the role of the rest of the stakeholders.
-

◆ D. Requirements Analysis & Users

12. ✓ Assume you are a systems analyst who will be conducting a requirements analysis for an individually owned brick-and-mortar retail store with a point-of-sale system. Identify who the typical internal and external users might include. ★
 13. Assume you are a systems analyst... Identify who the typical internal and external users might include. ★ (Repeated)
-

◆ E. Project Management & Planning

14. As a new project manager in a rapidly growing organization... what is something you might want to keep in mind before making your decision on how many people to hire? ★
 15. What is the trigger for communicating the project plan, and who is the audience? Why is communicating the project plan important?
 16. Which responsibility project managers do to manage changes that occur and/or are requested during a project?
 17. List out the factors to consider in estimating task durations.
 18. Show the popular tool used to identify tasks in the project management life cycle.
 19. Suppose you are the project manager of a medium-size project... Draw a Gantt chart.
-

◆ F. Use-Case Model & Object-Oriented Design (OOD)

20. What is the objective of refining the Use-case model in object design? Why is it important?
 21. Describe the goal of constructing object robustness diagrams? What are the components of those diagrams?
 22. Discuss about the main activities of object-oriented design.
 23. What is visibility in object-oriented design? Explain the different levels of visibility. ★
 24. Define the visibility in object-oriented design. Explain the different levels of visibility. ★ (Repeated)
 25. Why are the three kinds of objects needed in object-oriented design?
 26. Show the key reason for object reusability. Which methods developers use to achieve object reusability?
-

◆ G. State Chart Diagrams & Transitions

27. Describe the steps needed to construct the state chart diagram. Show the relationship between an object state and state transition event. ★
 28. Compare the relationship between an object state and state transition event. ★ (Repeated)
-

◆ H. Prioritization & Resource Allocation

29. Show the commonly used technique for prioritizing system requirements.
 30. Show the categories of resources to be allocated to the project.
-

◆ I. Communication & Collaboration Systems

31. How do communication and collaboration systems improve efficiency and effectiveness? What are some of the communication and collaboration systems that are being used by an increasing number of organizations? ★
 32. How do communication and collaboration systems improve efficiency and effectiveness? (Repeated) ★
-

◆ J. Integration & Tools

33. Suppose your company has a contract with a XYZ local firm... What is the term for this type of linking? What type of tool would you most likely use, and show some examples of these tools?
-

◆ K. Project Schedule Issues

34. Suppose you assigned a project manager for a XYZ project... What technique could you use to resolve this?
-

◆ L. Critical Path & Task Planning

35. Why is critical path analysis important for project management?
